ACROSS

- 1 Software that enables users to perform specific tasks
- 4 connects a PC to a cable TV system and internet connection
- 6 software to access the web
- 7 loading an operating system into memory
- 11 screen with poor resolution or glare problems could cause this
- 12 signals in a binary format
- 13 businesses selling goods or services to other businesses
- 16 allows products to be input into an automated manufacturing system
- 20 raw facts and figures
- 21 software protects computer, scans for virus signatures, behavior, and destroys viruses
- 22 CPU parts, __ and control unit
- 23 eight bits
- 25 document containing data
- 27 illegal act perpetuated against or through the use of computers or telecommunications
- 29 electrical roadways through CPU and motherboard
- 30 ___objectionable content includes Cybersitter, Cyber Patrol, and Net Nanny
- 32 ability to link computers to one another
- 33 of sifting through and analyzing vast amounts of data
- 35 short-distance (30 ft.) wireless, links cell phones, PDAs, and computers
- 37 functions include counseling, helping to thwart the intruders, and evaluating the system
- 38 uses what you have, know or are definitions and structure of the database
- 1 position of cell in a spreadsheet
- 2 software that controls access and the structure of a database
- 3 storage device that uses laser technology, optical disks
- 5 connects the same types of networks
- 8 combines several industries by exchanging digital data
- 9 field consists of a collection of
- 10 amount of data sent through a communications channel
- 11 examples of this technology include telephone, radio, TV, and internet
- 14 science of measuring individual body characteristics
- 15 entire wired and wireless world of communications and internet
- 17 database ___coordinates all activities and needs for an organization's database
- 18 devices to identify a person through a biological characteristic
- 19 expert systems, fuzzy logic, and robotics
- 24 programmable machine that processes raw data to obtain information
- 25 downside of personalization, regret, reluctance and excessive expectations about this
- 26 signals that vary in strength and quality
- 28 high-speed internet connection
- 31 illegally breaks into computers for malicious purposes
- 33 incomplete, outdated, or inaccurate data
- 34 small Java program run by a browser
- 36 silicon with millions of microminiature electronic circuits
- 39 executes instructions to process data
